

Ciao!

Hi!

今日は

INTERPREFY SELECT

Any event, any platform, any language.

Interprefy Select is the world's first global solution for adding language interpreting to any meeting and event. Interprefy Select plugs into any selected meeting, events or streaming platform to offer real-time interpreting anywhere, in any language.

How it works

We're streaming simultaneous interpreting from professional conference interpreters alongside your event. Users simply download the Interprefy app and select their language to hear crystal-clear audio interpreting with near-zero latency.

Flexible options

1 Interprefy Desktop App

The game-changing desktop app works alongside any event platform and will automatically mute all other computer applications as soon as the selected audio language is streaming.

2 Interprefy Widget

A simple language selector, neatly embedded in a partnering browser-based event platform, such as Intrado, SpotMe, ON24 & more.

3 Interprefy Mobile App

Participants listen to interpretation audio on their smartphone via the Interprefy mobile app, while following the video content on their computer.

INTERPREFY SELECT OPTION 1

Game-changing
Interprefy desktop
app

Select your event, select
your platform, select your
language.

Audio language channels available via Interprefy desktop app + Video from any preferred web conferencing platform

Provide your event participants with a stunning multi-language experience with the world's first global interpreting solution built for all types and sizes of events on any selected virtual events or web conferencing platform.

Participants simply join your event, download the Interprefy desktop app and select their preferred audio language channel.

As soon as the interpreter starts streaming, the app will auto-mute the computer to stream crystal-clear live interpreting with near-zero latency. And when the interpreter stops streaming, the audio will instantly switch back.

- ✓ Compatible with all virtual events, streaming, or web conferencing platforms
- ✓ Users access the event video and interpreting audio on the same device
- ✓ Simple installation from Windows app store or Interprefy.com (iOS)
- ✓ Automatic audio switch from source audio to language interpreting

INTERPREFY SELECT OPTION 2

Embedded Interprefy language selector widget

A seamless multilingual in-browser event experience

For events hosted on a browser-based virtual events platform, we offer a seamless in-app interpreting experience. By embedding an audio language selector directly into the event interface of a partnering platform, or alternatively into an existing webpage, as HTML widget.

Participants joining the event simply select their preferred audio language channel, mute the video player and listen to the interpretation in real-time.

Our continuously expanding partnership portfolio includes leading providers such as Intrado, SpotMe, BlueJeans, ON24 or GEVMELive.

Example 1 : Interprefy language selector widget embedded in SpotMe interface

Example 2: Interprefy language selector widget embedded in Intrado interface

INTERPREFY SELECT OPTION 3

Interprefy mobile app

Available on Android and iOS App Store

Video on desktop, audio on mobile.

In addition to the desktop app and in-browser widget solutions, participants can listen to the event audio interpreting through the Interprefy mobile app.

The mobile app solution is compatible with any third-party live streaming and meeting platform.

Attendees simply download the mobile app from the app store, enter the event token and select their preferred audio language.

1 Enter event token

2 Select preferred language

3 Listen to crystal-clear audio

CUSTOMER SUCCESS STORY

Bringing the global boxing family together for the 99th Convention of the World Boxing Association

Overview

Just two months before the event, it appeared as if the 99th Convention of the World Boxing Association (WBA), might fall through the ropes. But demonstrating their pioneering spirit, WBA adopted cutting-edge technology to bring together the great boxing family spread across the planet from July 1st to 4th, 2020.

The Approach

Marking the 99th anniversary of the world's oldest boxing organization, the 99th Convention of the World Boxing Association (WBA) was planned to set the stage for the WBA General Assembly, Officials Seminars as well as Championship and Ratings reviews. With surprise appearances from important figures like Bob Arum, Don King and Eddie Hearn, the convention aimed to picture the perfect prelude to the hundredth anniversary of the pioneer organization.

But in the midst of the tough times in the world due to Covid-19, WBA was once again challenged to live up to their role as pioneers. Cancelling the physical event, WBA undertook the challenge to overcome all obstacles and move forward with creative solutions that reinforced their motto to be pioneers.

Location of Event:
Global, online,
GoToWebinar &
GoToMeeting

No. of Attendees:
2,000+

Number of Languages:
2 languages, ESP - EN

Interprefy Service Provided:
Remote and digital support & project management for simultaneous translation

AV Partner:
-

Language Service Provider:
Interprenet

“*Interprefy is an effective and practical ally at the service of companies. In our experience, it allowed us to hold fluid meetings, solving communication problems that an organization like ours needs to solve in order to interact with our audience and make decisions in real time, without the language barrier being an impeding factor. Thanks to Interprefy, we ensured the success of Directorate meetings and our annual convention.*”

- Luis Vargas, Communications Committee Director, World Boxing Association

The Outcome

Choosing the webinar provider GoToWebinar and GoToMeeting to host the conference program virtually, the boxing world was given a platform to discuss the past, present and future of the boxing sport and tackle issues such as equality and gender, nutrition and veganism and the fight against doping.

Bringing a globally dispersed family together, the World Boxing Association needed to find a solution to offer equal opportunities to join the conversation for attendees from different backgrounds. That's why Interprefy was brought onboard and help plan and execute a multilingual events experience.

Having worked with WBA before, Interprefy's project manager sourced the same Interpreters that helped with real-time interpretation for WBA events in the past, adding a wealth of industry experience and terminology to translation work.

Using Interprefy Gateway, a team of interpreters delivered Spanish translation via the Interprefy interpreter platform into the GoToWebinar and GoToMeeting sessions. Participants simply selected their preferred language to listen to the event audio in English or Spanish.

Leading up to the event, the association held a series of press conferences to promote the convention and offer a glimpse into its content. Pioneering a digital boxing convention, many unplanned obstacles needed to be overcome, even during the event. Taking on the role as a sparring partner, Interprefy offered extensive project and technical support, and helped allocate additional interpretation resources, as sessions went into extra time.

"In the absence of the physical presence, technology allowed us to bring together the great boxing family spread across the planet. With them we shared all the topics and debates, and we raised a prayer for the thousands of victims caused by the Covid-19, with a heartfelt and special memory for the members of our sport who have died during this year", says president Gilberto Jesus Mendoza in an official statement. With a successful start into the 99th anniversary, the world's oldest boxing organization will continue to hold a series of various activities and prepare for their big anniversary: The hundredth convention, to be held in Russia in July 2021.

“ *Interprefy has been a great tool for us at the WBA. Its staff is exceptionally helpful, kind, and always ready to help us find a perfect solution in a very fast manner. We thank Interprefy for the success of our 99th Convention and other events.* **”**

- Zailuby Sofia Cuba, Executive Assistant to the WBA President, World Boxing Association

CUSTOMER SUCCESS STORY

5,000 Experts Tackling Global Health Issues During Multilingual Vaccine Virtual Days

Overview

Due to COVID-19, healthcare professionals have missed out on critical opportunities to connect with both experts and peers, whilst facing a global crisis that requires collaboration and knowledge sharing like never before. This is why an independent scientific committee of leading experts has designed an interactive 2-day programme to bring healthcare professionals together.

Hosted by GlaxoSmithKline (GSK), a number of sessions were held on the ON24 virtual events platform, addressing vaccination development, safety and more. To ensure health experts worldwide were given the opportunity to enter the discussion in their native language, GSK used Interprefy's remote simultaneous interpretation technology and services to provide listeners and speakers with 6 language channels during the sessions.

The Approach

With the pandemic making the execution of planned on-site events impossible, GlaxoSmithKline was challenged to take the congress online and coordinate the transition in a matter of weeks. To host the digital sessions, GSK chose the ON24 events platform for its vast range of possibilities and ease of use. But no matter how sophisticated the functionalities, one important piece of the puzzle was still missing just two weeks before event launch: Remote simultaneous interpretation. With thousands of experts from across the globe attending the events, overcoming the language barrier and creating a common understanding was key to making the Vaccine Virtual Days a success.

Having worked with Interprefy for a number of on-site events in the past months, GSK reached out to Interprefy for their recommendation on a remote interpretation solution. To their pleasant surprise, Interprefy had just entered into a partnership with ON24, allowing ON24 customers to receive interpretation services in any language to support digital events.

Location of Event:

Language Service Provider:
Interpretet

“Two weeks before the event, we were still stuck on the issue of interpretation. There were issues of non-compatibility and no solution in sight, so we were extremely delighted and relieved to hear that Interprefy’s services integrate into ON24”, says Isabelle Bang, Senior Congress Manager, Vaccines Global Conferences at GSK.

“*The fact that Interprefy managed to come on board and enable remote interpretation within two weeks is simply amazing. The whole process from quotation to execution was extremely fast, straightforward and well-coordinated.*”

- Isabelle Bang, Senior Congress Manager, Vaccines Global Conferences at GSK

The Outcome

Over 5,000 healthcare and pharmaceutical experts attended the digital sessions from June 29th to June 30th, joining discussions on vaccine development, safety, antimicrobial resistance and more.

Working in pairs, a team of 10 platform-trained interpreters with a great deal of industry-relevant experience provided remote simultaneous interpretation in Spanish, French, German, Italian and Portuguese throughout the sessions. With a tight schedule of panels and interpreting highly technical and scientific topics, interpreters worked hard to deliver high-quality services via the Interprefy platform.

“The event was a huge success in terms of figures, engagement and technical execution and we’ve received fantastic feedback”, Isabelle Bang sums up. In fact, the event proved to be such a success, that Vaccine Virtual Days is expected to become a regular series of events in the future.
